

TYPE APPROVAL

Certificate No.:
TA-DNV-CP-0082-10604-0

Issued:
2025-02-28

Valid until:
2030-02-28

Issued for:

Glass fibre rovings

with type designation(s)

E8DR-338 Series

As specified in Annex 1

Issued to:

Jushi Group Co., Ltd.

669 Wenhua Road (S.), Tongxiang Economic Development Zone, Zhejiang 314500, P.R. China

According to:

DNV-SE-0436:2022-09 Shop approval in renewable energy

and

DNV-CP-0082:2024-09 Type approval – Glass fibre rovings

Applying:

DNV-SE-0441:2021-10 Type and component certification of wind turbines

Based on the documents listed in Annex 1.

Any significant changes in the design and/or quality of the material will render this Type Approval invalid.

Hellerup, 2025-02-28

For DNV Renewables Certification

Harrison, Christopher

Service Line Leader, Component Certification

By DAKKS according DIN EN IEC/ISO 17065 accredited Certification Body for products. The accreditation is valid for the fields of certification listed in the certificate.

Shanghai, 2025-02-28

Product description and application

E8-338 direct roving with E8 glass formulation for weaving with silane-based sizing designed for polyurethane resin systems.

Approved variants

This Type Approval covers the direct roving E8-338 with silane-based sizing designed for polyurethane resin systems with the linear densities 600tex, 1200tex, and 2400tex with filament diameters 17 μ m:

E8DR17-600-338
E8DR17-1200-338
E8DR17-2400-338

Limitations for the product

The E8 glass formulation is not an E-glass formulation as per ASTM D 578 definition. Additional testing might be required depending on the intended field of application.

The approval is limited for application of the product in blades of wind turbines.

Any significant changes in design and/or quality of the material will render the approval invalid.

Last workshop inspection date: 2024-11-05

Certificate maintenance

A periodical assessment needs to be carried out 2.5 years after the issue date of the Type Approval. In the case of major changes of the approved production processes and methods during the validity time of the Type Approval, the changes shall be reported to DNV. An intermediate inspection of the production workshop(s) might be needed based on the implemented changes. A workshop holding a valid Shop Approval for manufacturing of composite materials is exempted from the periodical assessment.
